

Monthly Market Update

- Across domestic equity markets, results were positive, albeit muted. Large cap securities lagged their small cap counterparts once again during the month, as the year-to-date lead for small cap stocks grew bigger. Gains for the month were driven by the cyclical sectors, including IT and Financials, while the more defensive sectors that were the darlings of the first half of the year sold off. Internationally, developed markets finished the month flat, with value names outperforming growth names.
- Within fixed income markets, rising interest rates led to negative returns for U.S. Treasuries, while spread tightening helped spread sectors to outperform. Credit, specifically high yield, was the top performer during the month, though emerging market debt also produced sizeable gains.
- Real Asset markets were negative in August with the *Bloomberg Commodity Index* (-1.8%) falling as well as the *Dow Jones Global Listed Infrastructure* (-1.8%).

Asset Allocation Summary

- **Growth & Income Pool (+1.1%)** led both its custom and simple benchmarks by +110 bps. Long/short fixed income managers performed well, as Chatham continued to outperform its peers.
- **Growth Pool (+1.1%)** outperformed both its custom and simple benchmark by +90 bps and +100 bps, respectively. Domestic equity manager Adage outperformed the S&P 500 by +120 bps.
- **Income Pool (+0.7%)** led both its custom and simple benchmarks by +100 bps and +80 bps, respectively. Long/short fixed income managers aided performance.
- **Passive Growth Pool (+0.3%)** led both its custom and simple benchmarks by +20 bps.
- **Passive Income Pool (+0.0%)** led both its custom and simple benchmarks by +30 bps and +10 bps, respectively.

*Annualized Performance.

**The investment pools were established July 1, 2010, except for the Money Market Pool which dates back to December 2001.

**Risk/Return Analysis
Past Five Years¹**

¹ Performance is shown net of fees, using actual manager performance experienced by the Foundation's various pools beginning July 1, 2010.

*The Pro-Forma Growth Composite represents 5 years of returns using the current mix of managers in the Growth Pool.

NOTES TO HYPOTHETICAL INFORMATION

This material contains certain hypothetical performance and portfolio information. No representation is made about the overall hypothetical portfolios or their suitability or potential benefits for any client or investor and no advice or recommendation is given with respect to such hypothetical portfolios and are included for illustration purposes only. The hypothetical portfolios do not represent actual client or investor accounts. Hypothetical information, including hypothetical performance results, has many inherent limitations. They are generally prepared with the benefit of hindsight, may not involve financial risk or reflect actual trading or asset allocations for any portfolio and therefore do not reflect the impact that economic and market factors may have had on the manager's or advisor's investment decisions for that portfolio. In fact, there are frequently sharp differences between hypothetical results and the actual record subsequently achieved. No representation is made that such portfolio's performance would have been the same as such hypothetical results had the portfolio been in existence during such time.
