DISPROPORTIONATELY IMPACTED COMMUNITIES

Multiple factors were considered in order to determine zip codes disproportionately impacted by health and economic circumstances related to COVID-19, including **diagnosed cases of COVID-19** per 1,000 residents, **unemployment insurance claims** per 1,000 residents, and the percentage of households living in **poverty**. In general, zip codes for which two or more of these factors exceeded certain thresholds were considered to be disproportionately impacted.

Additional consideration was provided to zip codes previously defined as COVID-19 priority neighborhoods defined by the City of Houston. Data related to race/ethnicity and median household income was also referenced to inform final decisions. Finally, the Greater Houston COVID-19 Recovery Fund Grants Committee then reviewed the zip codes that met these criteria to ensure consistency with collective knowledge regarding circumstances throughout the four-county area.

Based on this analysis below are zip codes that correspond with 20 communities within the four-county Greater Houston area. Note, there were no communities identified as disproportionately impacted in Waller County.
